

Featherlite

This Featherlite is a true technological achievement in the FHR family, managing to provide the highest level of safety at the incredible low weight of 310 grams (12 ounces - not including accessories). The use of ultra-high-strength carbon composites combined with a new and more ergonomic leg design make this FHR model the lightest such device ever created. A revolutionary new belt loop allows for perfect integration within the cockpit thanks to a unique shape reducing the interference between the helmet and the seat's headrest. It has quickly reached the world's top racing class' drivers and permeated in the professional racing classes and among the more demanding drivers in terms of performance.

Technical data

Technology: very high strength carbon

Weight: From 310 grams

Available sizes: 20°M, 20°L, 30°M

Available in 3 colours

Supplied with black paddings, sliding tether and protective bag

Approved for use in NASCAR competition

- FIA 8858-2010 certified & SFI 38.1
